Rantatie, Kalasatama, Helsinki.
In all, 530 varnished windows.*

FINNISH KNOW-HOW

Kruunu products represent Finnish expertise in the wood industry. Kruunu windows and doors are manufactured to customers' measurements for even the most demanding applications. The products bring together decades of experience, traditional woodworking skill, quality, durability, and style.

Kruunu Windows is a growing company in the Finnish furniture and joinery industry. Our production facilities are located in Hartola.

KRUUNU

WINDOWS AND BALCONY DOORS

A POPULAR EXPERT

Kruunu Windows is a sought-after expert in renovation projects involving sites such as office buildings, schools, kindergartens, sheltered accommodation, hospitals, and health centres, as well as housing companies.

Kruunu Windows manufactures all of its products to order. The product is always designed for the customer in compliance with the invitation to tender. In addition to unfixed windows, which can be opened, we also manufacture fixed windows. Our expertise also covers anti-break-in windows, fire windows, and balcony doors.

Window Production Adaptation to Requirements

Kruunu windows and doors are compatible with the industry standards and legal requirements for energy-efficiency, tightness, thermal and sound insulation, and safety of use.

Pinewood preforms are used in the wooden parts of our windows, and the external frame uses and is protected by an aluminium profile. Kruunu windows boast top-quality soundproofing. As for tightness against wind and rain, our windows have achieved the best possible result in a test carried out by VTT Technical Research Centre of Finland.

Kruunu Products A Growing and Progressing Professional

The right raw materials, solid expertise, and good partners ensure the high quality of products and services for the Finnish construction industry. Thanks to our reliable partners, deliveries are carried out right on schedule.

Kruunu products have long been, and will long remain part of the success story of the Finnish furniture and joinery industries.
